In compliance with the goals outlined in our editorial policy, specifically with regard to increasing the visibility and quality of content, the review *Civilizar Ciencias Sociales y Humanas* has entered to the EBSCO Academic Premier, one of the most recognized international databases. Academic Premier Source is a constantly growing collection, currently with more than 650 scientific journals from Latin America, Portugal and Spain. We carry on in the dynamic of responding to the demand for quality items published in our review, handling a wider dissemination of knowledge.

It is a commitment to continue with the insertion of the review in several indexation systems and to work for the excellence of the editorial management.
